Secondary Single Subject Teaching Credential

1994

Cal State University Hayward

BS Honors in Biological Sciences

1994

Cal State University Hayward

BA Honors in Anthropology

1989

TEACHING EXPERIENCE

Alhambra High School

2001-2017

Developed and delivered curriculum in Anatomy and Physiology, AP Biology, Honors Chemistry,

Created a partnership with The National Park Service and community interests to remove invasive

flora and replant California natives

Piedmont High School

1994-2001

Developed and delivered curriculum in Biology, Honors Physics, Earth Science, and Ecology

Created a partnership with community interests for students to monitor local riparian habitat

1993-1994

Hayward High School

Developed and delivered curriculum in Biology and Interdisciplinary Sciences

Cal State Hayward

1993

Developed and delivered curriculum in lab class for Biology 1302

STATEMENT OF INTEREST

I have been a high school science teacher for over 20 years. I also have succeeded in attaining a PhD in Anthropology and a BS in Biology. In that time I also have taught many subjects including very rigorous curricula in AP Biology, Honors Chemistry and Honors Physics. I am currently enrolled in a Masters program in Sustainable Resources through Oregon State University. My eventual goal is to teach at the JC level. I have also been involved as a common core facilitator and attended several workshops on NGSS. I have been implementing the Next Gen standards for a few years and, as a science supervisor, have been developing a completely new science curriculum to facilitate the dissemination of NGSS. As a supervisor with Cal State, I look forward to working with students to develop their curricula and implementation of it as well as working within the college setting with other teaching professionals.
