We undertake the following as useful pedagogical strategies to be encouraged in the achievement of the objectives listed above:

- 1. Faculty teaching statistics courses are committed to meeting these objectives for all students.
- 2. The statistics BS degree incorporates material and assignments with relevance to students'

fives, experiences, and rutthe emproyment, including concrete topics and approxions.

3. Statistics course materials are presented in a variety of accessible ways that are understandable to students (e.g., lecture, small group problem-solving, everyday applications, projects).

	the five-year-review).
4. Āctīve inter	vention for students identified as at risk of not completing the requirements.
