

Intended for school districts interested in learning more about PLTW BMS and how to prepare students for rigorous post-secondary school training in biomedical sciences. The event will feature an overview of the PLTW BMS curriculum, steps to successful curriculum implementation, professional development activities, role of CSUEB as an Affiliate University, and interaction with teachers and students from local schools that have successfully implemented the BMS curriculum.

School District & School Administrators/Counselors and High School Teachers who are currently teaching (or planning to teach) courses in the PLTW Biomedical Sciences or Engineering.

PLTW students, teachers and professionals serving the state of California. Chat with them and learn about the benefits of implementing PLTW curriculum in your classroom.
